WATER POLLUTION

On December 13, 1961, the New Hampshire Water Pollution Commission issued an order to the Town of Rollinsford and other communities along the Salmon Falls River, stating that the Salmon Falls River had been classified by the Legislature in 1961 as a Class B-1 water.

The Commission in its order stated that it found that "either raw sewerage, inadequately treated sewerage, industrial waste or other waste are being discharged from your municipal sewer system into the aforementioned waters, thereby lowering the quality of the waters in question below the minimum requirements of the B-1 classification.

The Water Pollution Commission hereby orders that you take such steps as may be necessary to correct this situation and to abate the pollution caused by the discharge of raw sewerage, inadequately treated sewerage, industrial waste or other waste as it is being discharged from your system into the aforementioned waters.

It has been voted by the Commission to allow you a period of two years from the date of receipt of this notice to complete the necessary remedial action in accordance with the B-1 classification inacted."

As a result of this order, the matter was discussed at the 1962 town meeting and it was felt that the initial project should be undertaken by the entire town rather than by establishing a sewer district. As a result of the above order, contact has been made with Federal and State Authorities relative to obtaining a loan from the Federal Government to aid in defraying the cost of a preliminary report and plan prep-

aration for sewerage and sewerage treatment facilities for the Town of Rollinsford.

Under this program, the Federal Government will loan the Town of Rollinsford sufficient money to make a plan to correct the discharge of the sewerage into the river. In the event that the plan is not accepted by the Town, then the loan would not have to be repaid by the Town. In the event that the plan was acceptable and carried out by constructing interceptor lines and a sewerage treatment plan, then the cost of preliminary plan would be added to the cost of construction and the Town would have to pay its proportional share of the entire cost of planning and construction.

Both State and Federal aid are available to help defray these expenses.

The funds which can be obtained for planning will not cover all of the expenses of the Town and it will be necessary for the Town to raise approximately \$200.00 to cover expenses not included in the loan from the Federal Government.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Rollinsford:

My report to you this year will cover the following areas: Curriculum, Staff, Maintenance of Facilities, Enrollment and the Budget itself. Each year I attempt to give you a capsule report of the state of education in Rollinsford.

Curriculum-- No major changes have been instituted this past year. We have, I believe, strengthened the basic program of reading, arithmetic, science and social studies due to the continued high performance of the teaching staff. We have continued to study arithmetic and the adoption of a new series of textbooks. Educational television is a part of our regular curriculum, enabling us to enrich the teaching of music, science, and art. The purchase of a tachistoscope with prepared slides has resulted in training pupils to read more rapidly by reading words in groups rather than one at a time.

Teaching Staff-- This year we have the same teachers in all grades that were present on closing day last June. This is indeed an unusual situation which I doubt could be duplicated in many or even any school of our size in this State of New Hampshire. The teachers are all people with experience who know their job and who do the job.

The Principal, Mr. Hatfield, is a definite asset to our school. Not only is he a very good teacher, he is, I suspect, the main reason why turnover of teachers is not a serious problem. You are fortunate to have this man as your Principal.

Maintenance of Facilities-- Over the past two years we, under the direction of the School Board, have carried out a program of preventive

maintenance to insure the existence of a proper atmosphere for education. This year extensive interior painting was completed in the building. The halls and the lower portions of wall area in the classrooms were repainted-- a job which had not been done for at least seven years.

A 5 KW emergency generator has been purchased from the State Agency handling surplus property. It will be installed this year and is capable of furnishing enough power to run the boiler and supply electricity to the kitchen area. The entire cost of this unit, when installed, will not exceed \$500. The true value is ten times this figure in the event an emergency arises with loss of electrical power over a long period of time. The entire Town, not the school alone, will benefit if disaster strikes.

Enrollment-- For several years the number of pupils attending the school has not varied to any great degree; however, this year we do have an upward trend in the lower grades. Grade one, with thirty-five in the grade, is particularly larger than has been customary, which is some cause for concern. If this trend should continue, additional space may be required to house the pupils.

The kitchen is to be moved into the present third grade room which is quite small. This move will give us a good sized classroom, but will result in the loss of an eating area and all children will eat in regular classrooms. The new classroom will give us a properly sized third grade room, replacing one that is just too small.

Proposed School Budget-- The total is up-- the cost to the taxpayer is up! The reasons for the increase are higher tuition costs for high school pupils with more pupils in high school; teacher salary increases; higher costs for books, paper and other supplies, and the cost of relocating the

the third grade. This budget does not include any new programs; it will continue the curriculum as it now exists.

Once again I wish to take this opportunity to express my appreciation for the cooperation of the teachers, the principal, the school nurse, custodian, and Mrs. Wilson for their services to the children. Mr. Letarte is to be complimented for the way he and his drivers have transported children during this past year.

To you, Members of the School Board, I wish to also extend my gratification for your continued support and guidance in directing the education of the Youth of Rollinsford.

Respectfully submitted,

ROBERT L. BRUNELLE

To: The Superintendent of Schools
The Rollinsford School Board
The Citizens of the Town of Rollinsford,
New Hampshire

Again that time of the year has arrived when I have the pleasure of presenting to you a report that covers in part some of the activities of the year that has just passed - 1962-1963.

PURPOSES OF EDUCATION

Education is preparation for complete living, for citizenship in its broadest sense. Therefore the curriculum development program is given direction by our concept of the best kind of citizen. We recognize the supreme worth and dignity of the individual consistent with the general welfare. The first ten amendments to the Constitution were adopted primarily to safeguard the rights of the individual in our society. From this emphasis stems out educational program for free men in America. Education is a privilege, a right, and a responsibility.

The responsibility of citizenship was recognized early by the establishment of schools, primarily for literacy. Reading and writing were taught to achieve spiritual values, to enable the individual to be free, and to live well with his fellow men. The development of the individual to the limit of his capacity for complete living is still the major purpose of education. Among the worthy goals for living is an understanding of, and respect for, one's self including the self-discipline which comes through the basic moral and spiritual values. In America our most cherished goal is freedom. Progress toward freedom comes with the acceptance of the disciplines that freedom entails. The price of freedom is discipline in the character of the individual citizen.

The good citizen must be competent economically and socially. To be economically competent, the citizen must be able to take his place as a producing unit in our private-enterprise economy. He must be able to produce as much in goods and services as he consumes, or otherwise add to the general welfare and thereby help maintain the standard of living. To be socially competent he must be able to live well with his fellows so that life shall mean no less, and may mean more for his fellows because he is one of them. Education for social competence thus includes moral, ethical, and spiritual values for the benefit of both the individual and the group.

These two phases of citizenship education (individual and social competence) are not separate; they are interrelated and interdependent. For both individual and social competence, all citizens must have a working mastery of the three R's and other fundamentals. For example, the ability to read is equally necessary for successful employment in business and industry and for military service. It is also necessary that a citizen be well informed on local, national and world affairs in order to participate in an informed public opinion. Thus social competence includes the ability to be not only a good member of a family and a good neighbor but also a good citizen of the larger community. Our citizens must understand our way of life and its basic institutions and have a deep seated devotion based upon understanding.

In a totalitarian society in which the state comes first and public policy is not determined by the will of the majority, youth needs to be trained merely to believe, obey, and fight. But, in our republic with representative government, in which public opinion guides public policy, it is not enough to list the things in which citizens are to believe, the persons they are to obey, and the policies for which they are to fight. America needs straight thinking citizens

who contribute to an informed public opinion that firmly supports sound public policy. In a democracy every man is entitled to his own opinion but he also has the duty to base that opinion on the best available information. Scholarship is, therefore, important in a democracy because the quality of a man's thinking depends on the range, the validity, and the clarity of his ideas. A high level of general education is necessary to perpetuate the American way of life.

In accomplishing their purpose of educating for well-rounded citizenship, the schools are not alone in their efforts. The home, the church, and other community agencies share this responsibility. Schools are established to teach those essentials not taught by other agencies in society. Schools began originally with the introduction and wide use of written language, and in the beginning the curriculum was limited to reading, writing and arithmetic. Cultural advancements and changes in our ways of living brought new things to be taught. The amount of education required for complete living has greatly increased. The educational service rendered by the home and some community agencies has declined substantially. As a result, the curriculum has grown enormously.

No other people has ever expected so much of its schools, and no other people has ever been so well served by its schools.

The elementary school usually includes the kindergarten and the first six grades. These younger children can be better taught when separated from older pupils and organized into a separate school adapted to their special needs. The desired learnings and educational activities are carefully planned. Particular attention is given to the sequence of the curriculum. The program in each grade continues the preceding grade and leads to the next with close continuity. The educational needs of the children at any time grow not only out of the present but also out of

the demands of the days, weeks, and months, and years ahead. The goal of elementary education is good citizenship in the immediate future and for the remainder of life. It is achieved by helping children to be good citizens now. The elementary school provides the basic foundations of education with a carefully planned curriculum.

FACULTY

This year has been an exceptional one in that there have been virtually no changes in the make-up of the teaching staff. This is a condition that is most desirable in that it provides the school with a group of teachers who have had a wealth of experience, an exceptional amount of skill, and a degree of competence never found in a school where the turnover is both rapid and frequent. This does not mean that the faculty members have reached their greatest heights and are resting on what is euphemistically called their laurels. All members of the faculty are engaged in some form of professional advancement and several are well on their way to obtaining Master's Degrees.

One change in the faculty should be noted here. Miss Chloe Libby, the music supervisor, was obliged to resign from service with us as well as with the other schools of the union because of ill-health. It is hoped that she will be replaced before the end of the school year.

Your attention is directed to the Faculty Data Sheet for pertinent facts regarding the members of the Faculty.

ENROLLMENT

By reference to the enrollment table of the Rollinsford Grade School, it will be readily seen that the present enrollment is standing at an all-time high for the school.

Ten years ago, the enrollment of the School stood at 133, a very comforting figure. During that ten year span there has been a slow and steady growth in the number of pupils that are enrolled in school.

It would appear that the average increase per year during this period of time has been 9 pupils, or expressed somewhat differently a 67.6% increase over the ten year span.

It would also seem that the Rollinsford Grade School as such is still capable of taking several more pupils into its classes provided that the increase comes in certain areas or classes.

The building was originally planned, and well planned I might add by those people who were involved in its planning and construction, for a total of eight (8) classrooms containing 30 (30) pupils each. The physical size of the rooms limits the number of pupils to this figure. With the number of pupils that we now have, and with a steady, insistent increase from year to year of 9- 12 pupils, it might be well for the townspeople to be thinking in terms of expanding the present building so as to accommodate the increase in population of the school.

Because of the increased enrollment, and because of the particularly large group found in the first, second, and third grades, it will become necessary during the ensuing summer to place the final room in the building into operation as a classroom. The present third grade is now housed in the room that was originally designed as a kitchen. It is capable of seating about twenty pupils. We have now in this room

thirty-two pupils. We are therefore forced by the numbers of the classes that are coming to take over the present kitchen, convert it to a classroom, as it was originally intended to be, and to make the third grade room into a kitchen as it was intended to be. This is the final large classroom in the building that can be used for any purpose.

The citizens of the town should be very thankful that the present school was built with the number of rooms that it has since it has been possible to put into operation as classrooms three (3) rooms that were unused. This planning for future use has saved the Town of Rollinsford approximately \$100,000.00 which would be required to build on an addition that would house four rooms.

HOT LUNCH PROGRAM

The lunch program of the school is directed by the very capable Mrs. Barbara Wilson. Mrs. Wilson serves in the dual capacity of dietician and cook. She is assisted in the cooking and serving by Mr. Willis Lane.

The school is extremely fortunate in having such a capable team of cooks. They prepare meals that are tasty, wholesome, and have a great deal of eye appeal.

A typical lunch for each day of the school year is as follows:

- (1) A Hot Dish, consisting of one of each of the following:
 - (a) Beef, Pork, Lamb, Chicken, Turkey or Fish
 - (b) Potato, Rice, Noodles, Macaroni, Spaghetti
 - (c) Vegetables, according to the season, both fresh and canned.
- (2) A Sandwich of some variety

- (3) A dessert of some variety - cake, pie, cookies, ice cream, fruits, etc.
- (4) A Bottle of Pasteurized milk.

The following is a summary of the School Lunch Program:
